Advanced Institute for Skills Development

COURSE DESCRIPTION

We are living in a new age. Fast-changing technology has led to a free flow of information, creating a huge challenge for educators to understand the needs, interests and capabilities of the youth of today.

Reducing early school leaving is one of the priorities of the Europe 2020 Strategic framework for Education and Training, as well as Erasmus +. This course will introduce participants to the Grow coaching techniques along with emotional freedom techniques. Aggressive behavior and bullying inside and outside the classroom will be analyzed as well.

Participants will learn how to manage and reduce stress levels, thereby improving not only their overall health but also their day-to-day interaction with students and colleagues (by applying communication techniques in order to reduce early school leaving). Well-trained teachers can better meet students' learning expectations!

Course Objectives: create trust, motivate and empower teams. We need to empower positive values even if the conditions are not ideal, even if we have to deal with cultural diversity and differences in values. It's about managing techniques and how to use them for you and your organization's benefit. By the end of the course participants will have a substantial understanding of the coaching framework and its models. They will develop core coaching skills, including observation process, feedback, questioning, listening, raising awareness, establishing and maintaining an authentic relationship.

COURSE INFORMATION

Learning Outcomes

- Reduce stress levels, overcome anxiety & develop the necessary abilities to manage emotions within the classroom;
- Analyse bullying, aggressive behaviour (physical and verbal), creating strategies on how to deal with and eliminate them;
