Advanced Institute for Skills Development

# COURSE DESCRIPTION

A Digital Storytelling is a way of organising information, conveying emotions, and building community and a serie of still images or short videos that are combined with a narrated soundtrack to tell a story (Bull & Kadjer, 2004).

Although mobile technology is not yet widely used in schools, and in some cases even prohibited by internal regulations, the truth is that this technology, besides being a hallmark of contemporary life, is a powerful tool that challenges teachers and students to innovate in teaching learning practices.

This course intends to contribute to the understanding of this phenomenon and use their potential for developing Digital Storytelling.

**Course Objectives:** this course provides knowledge about this new pedagogical innovation, its advantages and disadvantages, as well as a very practical use of video tools to be implemented in the classroom.

# COURSE INFORMATION

## Learning Outcomes

- Know what a Digital Storytelling innovative pedagogical scenario is;
- Know the pedagogical potential of a Digital Storytelling innovative pedagogical scenario;
- Understand the different roles of a Digital Storytelling innovative pedagogical scenario;
