Course description

Communication plays an essential role in building trust, understanding and positive relationships within educational communities. Misunderstandings, emotional reactions and different expectations can sometimes create tension between learners, teachers, colleagues and families. Nonviolent Communication (NVC), developed by Marshall Rosenberg, offers a structured approach to expressing concerns, listening with empathy and addressing disagreements through respectful dialogue.

This practical course introduces the four components of NVC: observation, feelings, needs and requests. Participants will learn to distinguish facts from interpretations, recognise and express emotions, reflect on personal needs and values, and formulate clear, constructive requests. Through active listening, perspective-taking and realistic educational scenarios, they will practise communication strategies that encourage empathy, cooperation and mutual understanding while maintaining appropriate expectations and professional boundaries.

Through interactive workshops, paired exercises and guided roleplay, participants will apply NVC principles to everyday classroom and professional conversations. They will develop a practical communication action plan adapted to their educational context, recognising the importance of learner autonomy, accountability and institutional procedures when situations require formal intervention.

Transfer to practice and intended impact

The programme supports participants in connecting the course learning with their own professional context. Participants consider how relevant approaches, activities or tools could be adapted to their learners, priorities and institutional settings.

1. **Identify a relevant professional need:**
   Consider which learner need, classroom challenge or institutional priority the course learning could help address.
2. **Adapt the approach to your setting:**
   Select the activities, tools or approaches that can realistically be incorporated into your own professional context.
3. **Decide what progress would look like:**
   Consider how changes in practice, learner engagement, learning outcomes or another relevant result could be recognised.

05 / LEARNING APPROACH & METHODOLOGY

Learning Together Methodology

Learning Together courses combine guided input supported by presentations and multimedia resources with practical experimentation, creative workshops, case-based learning and hands-on tools. Participants connect the learning to their own professional situations and progressively develop an applied outcome, which may take the form of a presentation, project, session plan, action idea, reflection or another relevant output.

Peer / trainer feedback supports refinement throughout the process, while European exchange encourages participants to compare practices, perspectives and approaches across different educational contexts.

Methods applied in this programme

Observation & Language Reframing Practice

Participants distinguish observations from interpretations and practise expressing concerns through specific, factual and less accusatory language.

Empathic Listening & Perspective-Taking Exercises

Paired exercises strengthen active listening, paraphrasing, emotional awareness and perspective-taking without assuming another person's feelings or intentions.

Request, Boundary & Conversation Roleplay

Realistic educational scenarios help participants practise constructive requests, manage disagreements and maintain clear expectations and professional boundaries.

Collaborative learning, peer exchange and reflection

Participants work with European colleagues, compare professional contexts, exchange approaches and reflect on how the learning can be transferred to their own institutions.

> **Illustrative example: Reframing a Difficult Classroom Conversation with NVC**
>
> Imagine a teacher addressing a recurring classroom problem without beginning with blame. Participants describe what can be observed, identify their own response and priorities, listen to the learner's perspective and formulate a clear request. They then consider what boundaries, consequences or formal procedures may still be necessary.

An adaptable learning experience

Learning Together courses are delivered by trainers with relevant professional & pedagogical experience, **who are fluent English speakers**. The trainer may vary by edition, adapting the activities to the group's professional context and learning goals.
