

SPECIAL EDUCATIONAL NEEDS & DISABILITIES (SEND) IN THE CLASSROOM

learning**together**

*Constantly learning,
constantly evolving.*

OID: E10201112

Advanced Institute for Skills Development

COURSE DESCRIPTION

Children with special needs have different requirements, especially when it comes to classroom learning. They can display certain specific conditions such as autism, hyperactivity, concentration difficulties, motor difficulties, sensory difficulties, learning difficulties and difficulties in understanding and expression.

And so, there are many children with Special Educational Needs that require special education support in order to facilitate their academic, personal and socio-emotional development. This support involves ensuring equal opportunities for all, in order to achieve the best result for each person's potential.

This course is suitable for teachers of all backgrounds, teaching assistants, and other education professionals (mentors, support workers, and tutors) working in education settings. It is also suitable for school principals and members of the school boarder leadership team who would like to gain a greater understanding of SEND within the classroom.

Course Objectives: Early intervention is crucial for the growth and development of special needs children. By understanding their challenges and implementing strategic interventions, we can help maximise their potential and improve their chances of independent living. In this course, you will be taught interventions that are designed to help children with special needs learn skills that will help them achieve a higher level of personal self-sufficiency and success in school and in their community. This course has been developed to use ICT like animation, video, and user activities to maximise engagement and learning.

COURSE INFORMATION

Learning Outcomes

- Understand early risk factors and different types of barriers
- Improve primary, selective and indicated prevention
- Describe signs of young children's "atypical" development
- Increase parental involvement in education
- Explain the purpose, content, and function of early intervention service plans
- Identify the goals of early education for children with special needs
- Describe the symptoms of major physical disabilities
- Explain ways to provide appropriate care for children with various physical disabilities
- Identify and describe symptoms that signal possible problems associated with various list-appropriate goals for your early childhood program
- Develop tools and techniques for dealing with students with emotional problems
- Construct specific teaching guidelines and methods to meet the needs of each child with physical disabilities
- Strengthen competences in SEND students inclusion in mainstream classrooms
- Create and adapt lesson plans which would equally engage all learners
- Focus on and exploring various web 2.0 tools (Microsoft Tools, Google Tools and add-ons, interactive tools, formative assessment tools etc.) and apps that can be used in an inclusive classroom
- Discover useful open educational resources and ready-made materials
- Grow and develop professionally in an international environment, network, and build strong relationships with your colleagues from all over Europe
- Share best practices and apply them at a local level
- Improve ICT, communication and social skills
- Promote intercultural awareness
- Enhance the English language

COURSE INFORMATION

Duration: 1 week (6 days – Sunday to Friday – 8h30 to 13h30)
