COURSE DESCRIPTION

Artificial Intelligence is rapidly reshaping education and work – but without conscious action, it risks deepening existing inequalities.

This structured course addresses the urgent need to make AI a tool for inclusion, empowerment, and accessible innovation, rather than exclusion.

In this Erasmus+ mobility, participants will explore how AI can be used to bridge gaps in education, support diverse learners and workers, and promote equal opportunities across socio-economic, cultural, and linguistic backgrounds.

Through a balance of practical tools, ethical reflection, and social innovation projects, educators, trainers and project managers will learn to apply AI solutions that enhance accessibility, personalize learning and work experiences, and design socially responsible initiatives.

The course provides participants the ability to position themselves as leaders of inclusive digital transformation, ensuring that no learner is left behind in the AI-driven future.
