COURSE DESCRIPTION

This course aims to equip educators with the skills, tools, and pedagogical strategies needed to empower students as active climate changemakers. It focuses on transforming learners from passive recipients of information into engaged actors who can contribute to slowing down climate change through education, innovation, and community action.

The course follows an experiential, learner-centred and action-oriented approach, combining theory with practice and reflection. Methodological approaches includes project-based learning (PBL), participatory group work, outdoor and community-based learning, peer learning and reflective practice, action planning and learning transfer.

The course objectives are to:

- Develop climate action competences in education;
- Strengthen educators capacity to guide student-led sustainability initiatives;
- Promote skills-based, participatory climate education;
- Encourage youth engagement and responsibility in environmental action;
- Support the creation of realistic, transferable climate action projects.
